About This Video

When sadistic young thugs senselessly attack John Wick (Keanu Reeves) - a brilliantly lethal ex-assassin - they have no idea they've messed with the wrong guy. With New York City as his bullet-riddled playground, Wick embarks on a merciless rampage, hunting down his adversaries with the skill and ruthlessness that made him an underworld legend.

Honestly I don't review many games on Steam, but I think Nepenthe deserves a shout-out. It's truly a unique little RPGMaker game that, while short, really intrigued me and was well worth the price of \$5. The art style and the dialogue is fantastic, and if you like to explore like I do you'll have a blast finding all the hidden little items and descriptions for things. Also the developer has a very active Discord server and truly cares about the people who play their game. Overall, if you're on the fence it only takes max 2 hours to clear a run of the game and it's only \$5, so even if you don't like it you won't lose much anyway.. Good and realistic depiction of people, life and Japanese culture.

Warning: Not for weeaboos!. Game is pretty good and addictive. There are lot of bugs though. One of them being the braking assigned button stops working and suddenly you cant brake anymore. This is actually quite a challenging map that has taken me forever, although if you look up strategies then it gives you something to start off of or a plan. And i must admit, early access is pretty awesome. But this isnt a map to be reckoned with since they have updated it since probaly any of the videos you have seen of it. So its impossible to escape in a matter of days. But if you do own prison architect, this is definitely a thing you must get. Being stuck on one map sucks but having two to try and escape on while these guys work on making more maps for DLC is an experience that everyone should have. I guarantee you wont get bored when you play this map.

Pro's

- Large map
- A load of people
- A bunch of jobs

Con's

- Missing a few jobs from first level
- might be laggy on a laptop
- slightly hard

Overall review

9/10

stars = 4. 1 of the 3 Aim training apps I use. Definitely worth using often.. Why was English deleted? Again idiotic patch from Square Enix. Bravo!

Game is very good.. The game is a lot of fun, and the dev is very active on the forums.

It was meh... I actually find it a bit boring.. i have been playing for 3 week and had no problems i loved this game when i was a kid best grinder mmo but fix up the bugs all and all really good game if you are bored. This is the best game currently on steam (ಠ_ಠ) worth the price (ಠ_ಠ)
. Im here for the PLOT.

But in all seriousness the story is all random♥♥♥♥♥♥with hot girls who are apparently boys?
F*** if i know.. This game is a blast by one's self or with friends. Seriously, it can be difficult as crap on normal mode, but on easy it's much better for the newer player, and so far I've been having a great time!
